SPECIAL SAVINGS ON ISCAR ANTI-VIBRATION TURNING TOOLS

ISCAR's WHISPERLINE modular products provide effective anti-vibration solutions for machining operations (e.g. deep internal turning / boring, threading, grooving, etc.) that require long-reach tools with an extremely high overhang. WHISPERLINE products significantly reduce or even eliminate vibrations when working with a high overhang.

A key WHISPERLINE element is the anti-vibration bar system with a 'live' vibration dampening system located inside the bar body. Situated inside the bar is a unique damping mechanism to ensure the required dampening effect. The reactive damping mechanism comes into action during machining with high overhang work depths and acts as an effective counter to vibrations.

This highly effective anti-vibration damper effect is applicable for large depths of cut and high feed rates, and enables continuous machining. WHISPERLINE anti-vibration bars considerably improve machining stability and enhance insert life. These factors result in a significant increase in productivity, improvements in surface quality on high overhangs, reduced scrap levels, and enhanced profitability.

The tool assembly is comprised of of an anti-vibration bar and an exchangeable head carrying an indexable insert. The extremely high dynamic rigidity of the assembly ensures considerable vibration resistance. When machining with a high overhang, WHISPERLINE tools significantly improve stability and overcome dynamic behaviour limitations, resulting in improved machining performance.

WHISPERLINE anti-vibration products enable fitting of a variety of exchangeable cutting heads with a range of different insert geometries, including all ISCAR standard ISO turning inserts (CCMT, VCMT, DCMT etc.) for diverse applications. WHISPERLINE modular tools facilitate internal coolant to be supplied directly to the insert's cutting edge. Contact Tool & Cutter today to learn more about WHISPERLINE!

*** SPECIAL OFFER ***

GET 33% OFF OF ISCAR CANADA'S LIST PRICES ON SELECT WHISPERLINE ANTI-VIBRATION TURNING TOOLS* OFFER EXPIRES AUGUST 31, 2026

* Special pricing applies only to the anti-vibration bars – the exchangeable heads and indexable inserts are available at Tool & Cutter's everyday low prices
