

6" HEAVY DUTY MILLING VISE

Part Number
JD690

JUST \$979
IN-STOCK IN
LONDON, ON

PRICING IN EFFECT UNTIL
FURTHER NOTICE

FOB London, Ontario

- Narrow body style to allow more vises on a machine table.
- The bearing pack has been relocated to reduce oil/water/chip leakage into the vise body.
- Ball bearings make the pack more stable, stronger under pressure, and able to withstand the knock of a handle without breaking.
- Spherical segment creates all-directional alignment and reduces jaw lift for improved performance
- Spindle does not protrude past the end of the body.
- Brush seal design.
- Stationary Jaw: 4 bolt stationary design reduces lift.
- Pull-type design: Reduces stress on body during clamping.
- Chip evacuation: Straight through the body on sides and ends. Locations strategically chosen to not reduce body strength
